As new industries move to the area, now is the perfect time to think about a career in engineering. Southern State's engineering program could start you on your way to a new profession.

Those interested in an engineering career have many pathways to choose from at Southern State. The programs are designed to provide students with hands-on experience and cover various topics, including engineering graphics, AutoCAD, DC circuits and devices, computer-aided manufacturing, physics, technical report writing, hydraulics, pneumatics, and more.

could look like with an SSCC Engineering degree," says Barnett.
